

Can you help us with production of a patient toolkit for Advanced Therapies patients?

- Building on the work completed so far, we are looking producing a patient toolkit in the next 12 months
- This tool will contain generic information on advanced therapies including cell and gene therapies
- This information will be freely available to support patients, families, carers to understand the way these therapies work. They will also be a resource to researchers who can use the information to guide their patient information sheets for clinical trials
- In order to produce a high quality toolkit, we interview patients who have received these novel therapies or are waiting to receive them. You are offered **£25** for 1 hour interview.
- If you fall into this category and are interested to find out more, please contact:

Dr Lee Aiyegbusi, Research Fellow & Deputy Director Centre for Patient Reported Outcomes Research O.L.Aiyegbusi@bham.ac.uk
